MEMORANDUM

SUBJECT: Final Decision / Response to Comments for the Solutia JF Queeny Site, St. Louis Missouri

FROM: Bruce Morrison 
Project Manager
RCRA Corrective Action and Permits Section
Waste Remediation and Permitting Branch
Air and Waste Management Division

THRU: Don Lininger, Chief 
Waste Remediation and Permitting Branch
Air and Waste Management Division

TO: Becky Weber, Director
Air and Waste Management Division

Attached for your signature is the Final Decision/Response to Comments for the corrective action remedy proposed for the Solutia JF Queeny Site located in St. Louis, Missouri. No public comments were received and no changes were made to the proposed remedy.

The proposed remedy for the Site is Monitored Natural Attenuation and the implementation of land use controls that requires measures be taken to address potential vapor intrusion at future construction and prohibits residential development and potable use of groundwater.

Your signature on the Final Decision is requested. If you have any questions, please contact me at 7755.

U.S. Environmental Protection Agency Region 7
Final Decision and Responsiveness Summary for the Statement of Basis for the Solutia JF Queeny
Site St. Louis Missouri
RCRA ID # MOD004954111

The U.S. Environmental Protection Agency, Region 7 and the Missouri Department of Natural Resources jointly determined in 2017 that the investigations at the Solutia JF Queeny Site (hereinafter referred to as "the Site") were sufficiently advanced to warrant the preparation of a Statement of Basis documenting the proposed remedy for this Site.

Public participation activities associated with the Statement of Basis were conducted in accordance with Title 40, Code of Federal Regulations Part 124. A thirty-day public comment period was held from February 2, 2018, to March 4, 2018. A public notice announcing the availability of the Statement of Basis and the associated Administrative Record documents was published in the St. Louis Post Dispatch newspaper on February 2, 2018. Fact sheets were mailed to congressional contacts and persons having previously expressed interest in environmental issues at the Facility on or about February 2, 2018. The Statement of Basis and Administrative Record were available throughout the public comment period at the St. Louis Public Library-Barr Branch, 1701 South Jefferson Avenue, St. Louis, Missouri, and also at the EPA Region 7 Headquarters Records Center, 11201 Renner Boulevard, Lenexa, Kansas.

The proposed remedy for the Site is Monitored Natural Attenuation and the implementation of land use controls that requires measures be taken to address potential vapor intrusion at future construction and prohibits residential development and potable use of groundwater.

No comments were received during the 30-day public comment period concerning the Statement of Basis.

DECLARATION

The EPA Region 7 has determined that the final remedy to be implemented at the Solutia JF Queeny Site, as specified in the Statement of Basis, is appropriate and will be protective of human health and the environment.

Becky Weber, Director
Air and Waste Management Division
